BUSINESS SUMMARY:

Argyle Security, Inc., through its subsidiary, ISI Detention Contracting Group, Inc., provides physical security solutions to commercial, governmental, and correctional customers. The company participates in the perimeter security, access control, and video and design consultation segments in the correctional sector, as well as in the commercial/industrial/educational sectors. It also provides various fire detection security system solutions.

Argyle Security's goal is to become a leading global provider of services and solutions in the physical electronic security industry through an integrated buildup strategy. Argyle's channel focus is Video Surveillance, Access Control, Perimeter Protection, Intrusion Protection, Fire Detection and Threat Analysis, serving selected commercial, governmental and residential markets.

In July 2007, Argyle acquired ISI Security Group. In February 2008, Argyle formed Argyle Security USA, which encompasses the former ISI Security Group's operations in both the corrections and commercial sectors. Argyle Security, Inc. currently has two reporting segments: Argyle Corrections Group and MCS-Commercial.

Argyle Corrections Group is the controlling company for ISI-Detention, PDI, Com-Tec and MCS-Detention. Argyle Corrections Group is one of the largest providers of detention equipment products and service solutions, as well as turnkey, electronic security systems. These systems include unique engineering competencies and proprietary software products. Argyle Security was founded in 1976. The company is based in San Antonio, Texas

ATP Oil & Gas Corp. (NYSE: ATPG)

PROFILE:

ATP Oil & Gas Corp.
4600 Post Oak Place
Suite 200
Houston, TX 77027

Phone: 713-622-3311
Fax: 713-622-5101
Web Site: <http://www.atpog.com>

DETAILS:

Sector: Basic Materials
Industry: Independent Oil & Gas
Full Time Employees: 59

BUSINESS SUMMARY

ATP Oil & Gas Corporation (NASDAQ: ATPG) is engaged in the acquisition, development and production of natural gas and oil properties in the Gulf of Mexico and the North Sea. ATP acquires and develops properties, many of which have proved undeveloped reserves ("PUD's") at the time of acquisition that are economically attractive to ATP, but not strategic to exploration-oriented oil and gas companies. Such strategy provides ATP with the assets to develop and produce without the risk, cost and time involved in traditional exploration. Since its inception in 1991, the company has had an exceptionally strong development success record of 98% of taking projects to production that were previously undeveloped and non-producing. ATP is headquartered in Houston, Texas, with additional offices in Guildford, Surrey (U.K.) and IJmuiden (Netherlands). ATP trades on the NASDAQ Global Select Market under the symbol ATPG.

ATP creates value for its shareholders through the acquisition and development of significant proved undeveloped reserves frequently with the upside of probable and possible reserves. ATP operates its developments and reduces operating risks with projects that have a close proximity to developed markets for natural gas and oil; existing infrastructure of oil and natural gas pipelines and production/processing platforms; and a relatively stable regulatory environment (e.g. the Gulf of Mexico and the North Sea) for offshore natural gas and oil development and production. ATP Oil has estimated net proved reserves of 636.9 billion cubic feet equivalent comprising 329.2 billion cubic feet of natural gas and 51.3 million barrels of crude oil. The company was founded in 1991 and is based in Houston, Texas.

BUSINESS SUMMARY:

CytoCore, Inc., a life sciences company, designs, develops, and commercializes the screening systems to assist in the early detection of cancer. The company is focusing on the e2 cervical cell collection device, and the design and development of its various cancer screening systems for cancer and cancer-related diseases. It is developing InPath System to provide a noninvasive screening test for the detection of endometrial and uterine cancer and to enhance the cervical cancer screening process performed in laboratories. InPath System is a combination of protein antibodies, such as the Cocktail-CVX, and Cocktail-GCI and others, which allow the system to detect and highlight abnormal cancerous cells. It includes the e2 Collector, an approved sample collection device to replace the spatula and brush used to collect patient cytology samples; the Automated Image Proteomic System or AIPS workstation image analysis for automated slide screening of the P2X7 genetic biomarker from cytological and histological specimens; and a drug delivery system consisting of an applicator handle, which is the further development of e2 Collector handle, and drug-delivery modality in the form of a patch that provides a timed release of a therapeutic agent directly to the surface of the cervix. The company's products would be used in laboratory, clinic, or doctor's office. CytoCore was formerly known as Molecular Diagnostics, Inc. and changed its name to CytoCore, Inc. in 2006. The company is headquartered in Chicago, Illinois.

BUSINESS SUMMARY

Dundee Precious Metals Inc. is a Canadian based, international mining company engaged in the acquisition, exploration, development and mining of precious metals. It currently owns the Chelopech Mine, a producing gold/copper mine, and the Krumovgrad Gold Project, a mining development project, both located in Bulgaria, and is engaged in mineral exploration activities in Serbia. In addition, Dundee Precious owns the Back River gold exploration project in Nunavut, Canada and a 95% interest in the Kapan Mine in Armenia. The Company also holds a significant and strategic portfolio of investments in the precious metals and mineral related sector.

DPM's business objectives are to identify, acquire, finance, develop and operate low cost, long life primarily gold mining properties; and to provide support to selected mining companies by providing required capital through strategic investments. The Company intends to create shareholder value through its disciplined but opportunistic business model.

The Company is assembling a pipeline of mining projects at various stages of development. The Company currently has projects in: (1) the operating and redevelopment stage; (2) the feasibility and development stage; (3) the scoping and advanced exploration stage; and (4) the early exploration stage. DPM intends to maximize the potential of and realize value through the exploration, development and operation of its existing properties.

The Company is also actively evaluating acquisition opportunities of mining properties to fill and expand its project pipeline as well as continuing to make strategic market purchases of mining securities where synergistic opportunities exist in order to balance its pipeline for continued growth.

BUSINESS SUMMARY

Ivivi Technologies, Inc., a medical technology company, engages in the designing, developing, and commercializing electrotherapeutic technologies. Its pulsed electromagnetic field (PEMF) technologies use electric or electromagnetic signals to help relieve pain, swelling, and inflammation and promote healing processes and tissue regeneration. The company utilizes this technology, through patented SofPulse device line of products, which consists of three components: electroceutical signals, signal generator, and applicator. The signal generator produces a specific electroceutical signal that is pulsed through a cable and into the applicator. The applicator transmits the electroceutical signal into the desired area, penetrating medical dressings, casts, coverings, clothing, and virtually all other non-metal materials. Ivivi Technologies products are used for the treatment of acute or chronic wounds, including post surgical wounds; edema and pain following plastic and reconstructive surgery; and pain associated with the inflammatory phase of chronic conditions. It has a strategic alliance with Inamed Medical Products Corporation for distribution. The company was founded in 1989. It was formerly known as AA Northvale Medical Associates, Inc. and changed its name to Ivivi Technologies, Inc. in 2004. The company is headquartered in Northvale, New Jersey

BUSINESS SUMMARY

Lexington Corporate Properties Trust operates as a self-managed and self-administered real estate investment trust (REIT). The company acquires, owns, and manages a portfolio of office, industrial, and retail properties net-leased to corporate tenants in the United States. It also provides investment advisory and asset management services to institutional investors in the net lease area. As of June 30, 2005, the company operated 185 properties and managed 2 properties. Lexington Corporate Properties Trust has elected to qualify as a REIT for federal income tax purposes. As a REIT, it would not be taxed on the portion of its income, which is distributed to shareholders, provided it distributes at least 90% of its taxable income. The company was founded in 1991 and is based in New York City.

BUSINESS SUMMARY

MediaNet Group Technologies, Inc., through its subsidiaries, engages in the design, development, and marketing of branded loyalty programs, Web sites and, audio and video products in the United States. It operates through three divisions: BSP Rewards, Brand-A-Port, and Memory Lane Syndication. The BSP Rewards division provides private branded loyalty and reward Web malls and programs to companies and organizations and for on-line and in-store merchants. The loyalty and rewards program is designed as a shopping service through which members receive rebates on purchases of products and services from participating merchants. The Brand-A-Port division builds and hosts Web sites for business customers. These Web sites include the name, logo, color scheme, and customized or personalized content provided by the customer, as well as serve as Internet Web portals that provide users with direct access to news, weather, and other information available on the Internet. The Memory Lane Syndication division owns 130 color episodes of the Howdy Doody television show. It licenses to manufacture and market videos of these episodes, as well as for television and radio syndication. This division also sells CDs/DVDs known as Songs From The Neighborhood / The Music of Mister Rogers' through various wholesale and retail distributors. The company was founded in 2000 and is based in Margate, Florida.

Many of the motorcycle and motorcycle engine component parts are machined from solid billets of aluminum utilizing Computer-Numerical-Control (CNC) machines.

WHITE MOUNTN TITANM (WMTM.OB)

PROFILE:

White Mtn Titanium Corp
Suite 2150 1188 West Georgia Street
Vancouver, BC V6E 4A2

Phone: (604) 408-2333
Fax: (604) 669-4776
<http://www.wmtcorp.com>

DETAILS:

Sector: Basic Materials
Industry: Industrial Metals and Minerals
Full Time Employees: 64

BUSINESS SUMMARY

The Company holds mining concessions on the Cerro Blanco property consisting of nine fully constituted exploitation mining concessions and twenty-seven exploitation mining concessions in the process of being constituted, over approximately 8,883 hectares located approximately 39 kilometres west of the City of Vallenar in the Atacama, or Region III, geographic region of northern Chile. The Company's principal objectives are to advance the Cerro Blanco project towards a final engineering feasibility, and to secure off-take contracts for the planned rutile concentrate output. It would be the intention to sell the rutile concentrate to paint and pigment producers. Work also continues to investigate the commercial viability of producing a feldspar co-product. The feldspar could find applications in the glass and ceramics industries.
